The parcel is an actively billed sewer account within LACOSAN for the collection and treatment of public sewer. The addition of any dwelling will require Capacity Expansion Fees depending on the size/type of dwelling that is proposed. Is this a Temp trailer? size? Permanent? Type?

@Lori Baca, the trailer is temporary in nature and would be required to be removed, should the need for assistance no longer be necessary. The rv is a 28' Aljo, as the applicant indicated above. Planning is not going to permit this rv as a permanent structure, but the applicant is currently draining the rv into the on site septic as the trailer becomes full.

If this is a temp dwelling, then there are no more comments from us. The temp dwelling will be charged the residential rate (as it is now).
