Subject: [EXTERNAL] RE: Request for Review for Sufficiency: UP 21-17 Seigler Springs North Cultivation Project

UP 21-27 Seigler Springs North Cultivation Project:
 Is enrolled as a Tier 2L site under WDID 5S17CC429129; they have been enrolled since 10/23/2020;

The responsible parties and APNs in the RFR match their enrollment. All annual reports have been submitted and invoices have been paid.

Cultivation Area covered: 174,240 SF; Disturbed Area covered: 180,000 SF; An SMP and NMP were submitted in December of 2020. It appears that these technical reports will need to be updated. The maps within SMP show a different layout of proposed roads that those in the RFR documents. The SMP also states that there will be up to 10 acres of disturbed area. Before development begins on this site, the Dischargers will need to submit a Change of Information to update the proposed disturbed area (and cultivation area if necessary) and will need to amend their SMP to match current proposed plans.

Hi Marry

The Boundary lines shown on the plans prepared by Northpoint Consulting Group, dated 29 July, 2022 do not match record distances as shown on that certain record of survey, filed in Book 41 of Records of Survey, Page 5 (and attached)

Recommend that applicant hire a licensed land surveyor to verify setback prior to start of construction.

Thanks

Vance

Good Morning Mary,

The KFPD would like to see that all portions of the project comply with the current fire code standards that is adopted when the permit is issued. Compliance must be met with any other standards, ordinances that have been adopted such as 4290 and 4291 standards. Compliance must be met with any applicable NFPA standards as well.

Thank you,

UP 21-17 Seigler Springs North Cultivation Project

Dear County of Lake,

As woodland and forest habitat would not be impacted by this project and with impacts to the grasslands minimal, the mitigations mentioned seem sufficient.

Redbud Audubon has no additional comments and we thank you for the opportunity to comment.

re: UP 21-17; IS 21-18 / APN 115-007-03 & 115-007-06 / Brian Pensack, Kim Gardener, Garrett Burdick

Dear Mary Claybon,

Records at this office were reviewed to determine if this project could adversely affect cultural resources.

Please note that use of the term cultural resources includes both archaeological sites and historical buildings and/or structures. The review for possible historic-era building/structures, however, was limited to references currently in our office and should not be considered comprehensive.

Project Description:

The applicant is requesting approval of a Major Use Permit to allow the following licenses: Four (4) A- Type 3 "Outdoor": Outdoor cultivation for adult use cannabis without using light deprivation and/or artificial lighting in the canopy area at any point in time from 10,001 to one acre, inclusive, of total canopy size on one premises. One (1) Type 13 "Distributor Transport Only, Self-distribution": The transport of medicinal cannabis goods between entities licensed pursuant to California Code. According to the applicant's application package, the proposed project will include the following: Outdoor Cultivation (Total mature cannabis canopy on ground or in planter bags with imported soil: 174,240 sq. ft., Total cultivation area: 435,600 sq. ft.). The facility layout will be as follows: One (1) proposed 15'x15'x6' chain link trash enclosure, two (2) proposed 8'x40'x8' proposed shipping containers, one (1) proposed 40' x 20' compost area, five (5) 2,500 gallon water tanks, one (1) Chemical storage area, and one (1) compost and soil mixing area.

Previous Studies:

XX This office has record of the below previous cultural resource studies of the proposed project parcels (*see further recommendations below*).

Report No.	Author(s)	Year	Title
S-014578	Carlys Gilbert	1993	Archaeological Review of Prather ACP
S-016772	Mark Gary	1994	Archaeological Review of 1-94-NTMP-001 (Prather) (letter report)
S-047151	Douglas S. Prather	2015	Confidential Archaeological Letter for the Hayes Emergency Notice, Lake County, California
S-054792	Tim Spillane and Dylan Stapleton	2020	Cultural Resources Assessment For The Cannabis Cultivation Operation At 11615 And 11625 Seigler Springs North Road, Middletown, Lake County, California

Archaeological and Native American Resources Recommendations:

XX While the proposed project area does not contain any known archaeological sites, the proposed project parcels contains or is adjacent to three archaeological site(s) P-17-000015 (CA-LAK-001811/H), P-17-000016 (CA-LAK-001812H), and P-17-002593 (CA-LAK-002109/H). Should the proposed project area be modified, it is recommended that a qualified professional archaeologist update the conditions of these sites on Office of Historic Preservation's DPR 523 resource recordation forms, assess potential impacts of the proposed project activities on these resources, and provide project-specific recommendations as warranted.

XX Based on the results of S-054792 (Spillane and Stapleton 2020), the proposed project area has a low possibility of containing unrecorded archaeological site(s). Therefore, no further study for archaeological resources is recommended. If archaeological resources are encountered during construction, work should be temporarily halted in the vicinity of the discovered materials and workers should avoid altering the materials and their context until a qualified professional archaeologist has evaluated the situation and provided appropriate recommendations.

In the future, should the proposed project area be changed or modified, we recommend a qualified archaeologist conduct further archival and field study to identify cultural resources.

XX We recommend the lead agency contact the local Native American tribe(s) regarding traditional, cultural, and religious heritage values. For a complete listing of tribes in the vicinity of the project, please contact the Native American Heritage Commission at 916/373-3710.

Built Environment Recommendations:

XX Since the Office of Historic Preservation has determined that any building or structure 45 years or older may be of historical value, if the project area contains such properties, it is recommended that prior to commencement of project activities, a qualified professional familiar with the architecture and history of Lake County conduct a formal CEQA evaluation.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.

For your reference, a list of qualified professionals in California that meet the Secretary of the Interior's Standards can be found at <http://www.chrisinfo.org>. If archaeological resources are encountered during the project, work in the immediate vicinity of the finds should be halted until a qualified archaeologist has evaluated the situation. If you have any questions please give us a call (707) 588-8455.

Sincerely,

Bryan Much
Coordinator

Trish Turner
